This book is a very quick read reference guide (only 64 pages) on world religions. It is designed to help you understand the major religions in the world today by highlighting how and where they originated, their beliefs, traditions, and how they compare with Christianity. It also gives a breakdown of the branches, churches and denominations within the Christian religion that will help you understand the history and differences within each. I would highly recommend this book to anyone who is looking for a resource for understanding all the major world religions, and especially to Christians young and old who will find this information useful in preparing themselves for defending their beliefs and helping others to understand why true Christianity is unlike any other religion in the world.
